

# Don't miss out on the second event in the Monroe County Shop Talk Series

Saturday, January 26

8:30 – 11:30 am

Ida Twp. Hall  
3016 Lewis Ave, Ida, MI

**Jim Hoorman – NRCS Ohio**

Choosing the best cover crop mix for your soil health needs (species choice for soil health benefits and termination strategies)

**Cover  
Crops**

**Nutrient  
Management**

**Eric Richer – Ohio State University Extension**  
Tools for making effective adjustments to your fertility strategy by managing Nitrogen in corn. Saving money without sacrificing yield by utilizing advantages of testing strategies such as PSNT and late season corn-stalk testing.

**MAEAP Phase 1 Educational Event**

Presenters will cover nutrient testing options to help make efficient changes to your fertility strategy, an overview of how results influence nutrient recommendations, and how to choose the right cover crops to address the soil health concerns in your operation.

Attendees will also get information about **NEW** funding opportunities available to producers in the Western Lake Erie Basin.

**RSVP with Monroe Conservation District by Friday, January 18th**
